PRINT firstName
PRINT lastName
PRINT streetAddress
PRINT city
PRINT zipCode
```

2. source code

```
public class NameAddress1 {
    public static void main(String[] args) {
        // Variable declarations
        String firstName = "First name:Happy";
        String lastName = "Last name:Lucky";
        String streetAddress = "Street address:1234 Happy
street";
        String city = "City:Lucky City";
        String zipCode = "Zip code:90101";
        // Output information
        System.out.println(firstName);
        System.out.println(lastName);
        System.out.println(streetAddress);
        System.out.println(city);
        System.out.println(zipCode);
    }
}
```

3. screenshot of executing application

```
First name:Happy  
Last name:Lucky  
Street address:1234 Happy street  
City:Lucky City  
Zip code:90101
```

4. git repository
